

Environmental Policy & Objectives for the period of 2018-19

NGK Overseas Environment Policy

As a globally developing core manufacturing organization, we are aiming to simultaneously realize environmental preservation and corporate growth, based on the participation of all our employees, in order to contribute in construction of a sustainable society.

NGK (India) Environmental Policy

NGK Spark Plugs (India) will strive for harmony with society & global environment, while serving the world, offering new values based on the principle of high quality throughout the entire life cycle of our environmentally friendly NGK Spark Plugs.

Action Guidelines

- We strive to utilize our unique technology to develop and offer environment-friendly products.
- Through all of our business activities, we make particular efforts to prevent global warming, make efficient use of resources and control chemical substances in order to conserve the environment.
- We strive to raise the awareness of the environment among our employees to ensure that they all make positive efforts to conserve the environment.
- We observe the laws, ordinances, and agreements concerning environmental conservation.
- We aim to substantiate our information disclosure and communication activities, and also carry out environmental contribution activities aimed at coexistence with the regional community.
- In order to achieve these targets, we will strive to make ongoing improvements to our environmental management system.

Occupational Health & Safety Policy and Objectives for the Period of 2018-19

NGK Overseas Health & Safety Policy

With high respect to humanity, we act on occupational health and safety as the company's starting point and measure.

NGK (India) Health & Safety Policy

"NGK Spark Plugs (India), positioned occupational health & safety as the starting point of business activities with respect for employees, as foundation in our activities".

Action Guidelines

- Observe the laws and regulation, and voluntary standards on occupational health and safety.
- Prevent occupational accidents and decrease risks by continuously improving the management system and performance of occupational health and safety.
- Conduct efforts to increase physical and mental health, and prevent health disabilities of employees.
- Disseminate this policy to all employees, promote awareness by education and enlightenment, and expand the occupational health and safety activities by involving all employees.

Quality Policy

- Respond to customer needs while giving first priority to quality.
